

POSITION: MECHANICAL ENGINEER

DIRECT SUPERVISOR: Principal Engineer/ CEO

LOCATION: SYLENG Head Office, Champs Fleurs, Trinidad

Job Summary:

We are looking for a Mechanical Engineer who can deliver detailed analytical concepts and then back up those concepts with written justification. The Mechanical Engineer will act as a mentor to the Technicians on staff and create a work environment that is conducive to teamwork and strong professional development.

The successful candidate for this position will be able to take a project from the conceptual stage through to completion, taking into account budgeting and operational considerations.

Responsibilities:

1. Perform initial and ongoing design reviews.
2. Deliver documentation offering a critical analysis and suggestions for correcting errors.
3. Identify process deficiencies and develop solutions to improve those deficiencies.
4. Submit a scope of work for each project that includes budgetary numbers and the goal of each project.
5. Develop CAD project drawings and review drawings from Technicians for accuracy.
6. Collaborate with Project Managers to develop an accurate accounting of all engineering hours required for various types of internal projects.

Requirements & Skills:

1. Bachelor's Degree in Mechanical Engineering required (Master's preferred).
 2. Licensed or soon to be by the Board of Engineering of T&T.
 3. Project Management experience an asset.
 4. 4+ years' experience in an engineering leadership role.
 5. Strong knowledge of CAD/CAM software and drafting procedures.
 6. Excellent prioritization and project development skills.
 7. Proficient in design of Commercial Air Conditioning System and the use of computer analysis software.
